

IV

FORO DE INVERSIÓN EUROPEA EN URUGUAY
EUROPEAN INVESTMENT FORUM IN URUGUAY

Transforming the future through renewable energies

24th October - Conference
25th October - Virtual B2B

Organised by

With the support of

The European Union is an important trading partner and the first foreign investor in Uruguay

40% of foreign direct investment in Uruguay originates from the **European Union**, with an even higher proportion in the renewable energy sector. Europe plans to become the first climate-neutral continent by 2050. To achieve this, 2022 EU energy policy REPowerEU set the goals of: transition towards cleaner energy, increase of energy efficiency, diversification of supplies and investments in renewables.

Uruguay stands out in Mercosur with its green policies and almost 100% renewable electricity generation. With its second energy transformation, focused on green hydrogen, Uruguay has demonstrated interest in European experience, technological knowledge and investments. Uruguay offers investment incentives in the sector too. Several European investments are in progress.

IV European Investment Forum in Uruguay

**Transforming the
future through
renewable energies**
