so sure

Quality is the core element in order to obtain successful Valrom products. Each activity within the company involves planning, organizing, providing quality services, compliance with deadlines and ability to provide effective solutions.

so innovative

We offer our customers integrated solutions and systems. We capitalize on the innovation capacity through the implementation of new ideas, together with effective technological processes, innovative design and finding smart solutions to solve classical problems.

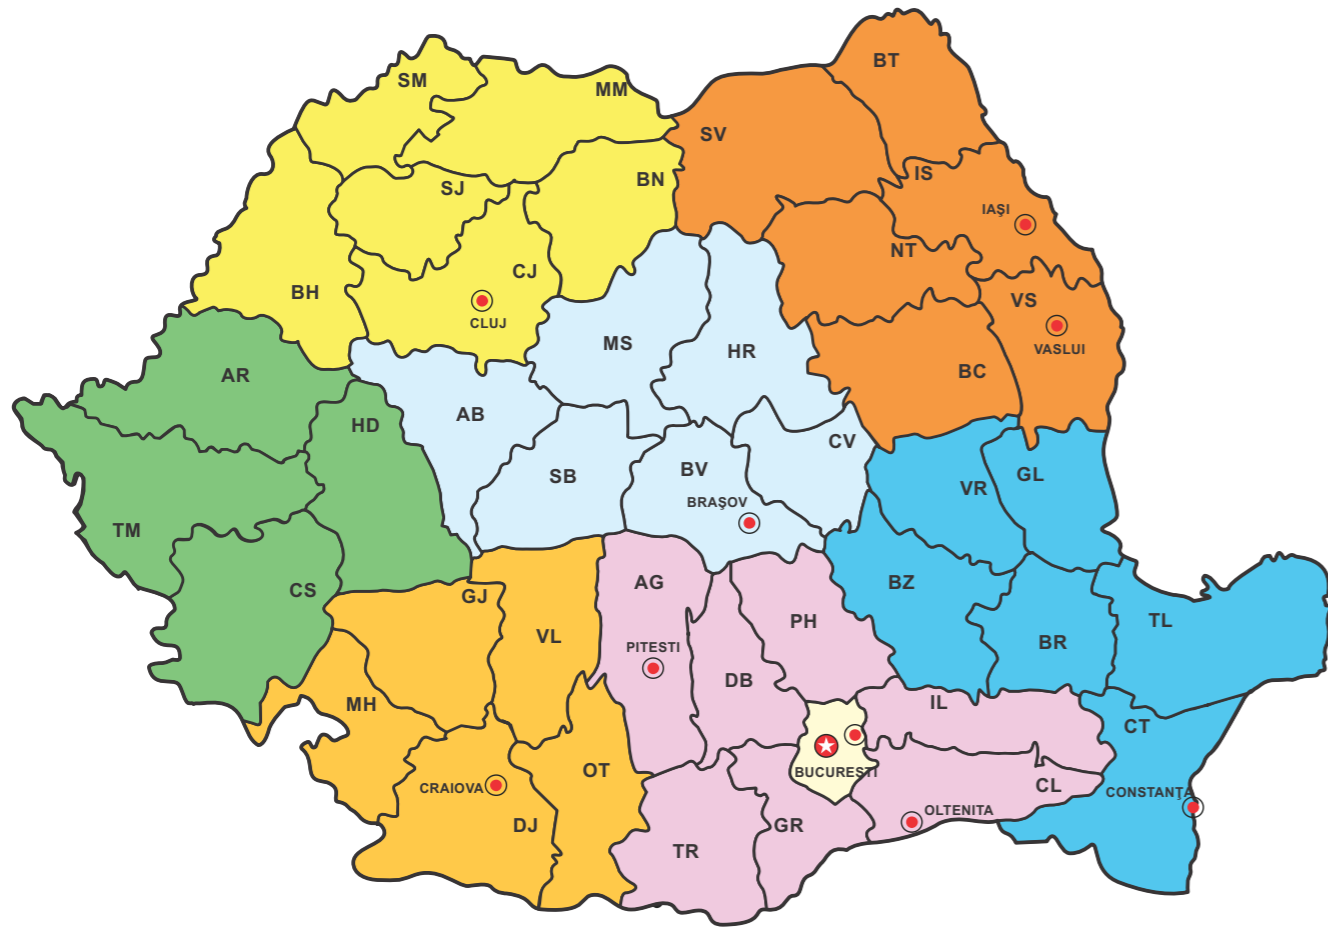

It's easy when you're the partner of the leader.  
 It's very easy to be a professional  
 It's even easier to create complete systems  
 It's so simple. Enjoy Valrom's solutions

**26** years of experience

heating, water, gas and sewage installations

Valrom manufactures and sells:

- water and gas supply systems
- internal and external sewage systems
- filtration, water storage and pumping systems
- domestic wastewater treatment systems
- sanitary and heating systems

offering quality, safety and efficiency.

**WaterKIT** represents a complete system, designed for water distribution, irrigation and fire systems, consisting of HDPE pipes and fittings, water meter chambers.

**Dimensions**

HDPE pipes available diameters, between 20 and 1200 mm.  
Depending on diameter and SDR, pipes are delivered in coils (length 100 m or 200 m) or in bars (length 13 m) .

**GasKIT** represents a complete system, designed for gas distribution.

**Dimensions**

HDPE pipes available diameters, between 32 and 1200 mm.  
Pipes can be delivered in coils, having 100 or 200 m, for diameters up to 110 m (included).  
Pipes can be delivered in 13 m bars, for upper diameters.

**AgriKIT** is a professional irrigation system consisting of pipes, fittings, valves and irrigation or sprinkler elements.

**netLINE** is a complete system designed to install and protect cables and fiber optics used in communications networks. It consists of chambers, PEHD and PVC cable protection tubes, PEHD microtubes, connectors.

**aquaClean** represents a complete system, used for precleaning and cleaning waste waters.

- aquaClean – SBR waste water treatment plants for domestic applications
- aquaClean – septic tanks
- aquaClean – grease separators
- aquaClean – coalescing oil separators

**Kompact** sewage collectors. Polyethylene sewage collectors represent the ideal solution for an efficient sewage applicability.

heating, water, gas and sewage installations

**aquaPur®** is a POE (point-of-entry) drinkable water storage, filtering and pumping system for your home. aquaPur® uses the silver ions technique developed by Valrom in order to prevent microflora in the storage tank from expanding.

**StockKIT** represents a complete system, used for liquid storage (water and/or other liquids for consumption). This tank can be also used as a buffer appliance.

heating, water, gas and sewage installations

**EasyKIT** is a system designed for waste water discharge inside buildings, consisting of polypropylene tubing and fittings. Valrom PP pipes and fittings are used for:

- waste water discharge pipe (low and high temperature);
- rain water pipe;
- ventilation pipe.

The main advantages of the EasyKIT system are as follows:

- high and low temperature resistance;
- extremely easy and fast installation;
- installation does not require the use of special tools;
- flexibility and highly resistant to scratching and abrasion.

**EasyFONO** is the soundproof system for wastewater consisting of push-fit pipes, fittings and accessories, with a wide range of diameters DN32 to DN160, for pipes, and from DN32 to DN110 for fittings. Pipes and fittings are made of mix of polypropylene with mineral fillers to ensure a good soundproofing performance. It is certified SR EN 14366 according to the measurements made at Fraunhofer Institut für Bauphysik for the determination of acoustic performance.

**Easy KIT**

**Easy FONONO**

**RandomKIT** represents a complete system, used for interior cold/hot water supply systems, heating systems.  
Available diameters: between 20 and 110 mm.

**PexKIT** is a plastic piping system for hot and cold water installations and heating systems for houses, public and industrial buildings.

Application areas for PexKIT system:

- cold/hot water supply systems;
- radiating heating systems;
- floor or wall heating/cooling system and snow-melting.

**Random KIT**

**VALROM Pex KIT**

heating, water, gas and sewage installations

AquaPUR filtration systems are used in domestic applications with the ability to filter water mechanically, chemically and biologically, depending on the needs determined by specific analyzes.

The softening systems reduce water hardness eliminating the risk of limescale. Prevent the whitening of taps, sinks and sanitary items in contact with water and eliminate the risk of red and black stains on sanitary items. The drinking water is brought to the drinking parameters.

Starting with 2020, Valrom produces the following types of disposable masks certified ISO 9001:

- L90 Community face coverings (BFE>99% according to the European Standard EN 14683:2019+AC:2019. Product covered by the provisions of the European Commission CWA 17553:2020 - Community face covering)
- Medical face masks, type II R (according to the European Standard EN 14683:2019+AC:2019)
- Respiratory protective half-mask, type FFP (according to the European Standard EN 149:2001+A1:2009)

Pantelimon Factory - Rotomoulding has a surface of 2210 sq.m:

- 210 sq.m warehouse
- 2000 sq.m manufacturing and office facilities

Equipment: 3 rotomoulding machines

Raw material: PE

Annual production capacity: 2200 T/year

Products:

- Water Tanks
- Inspection and visit chambers
- Water meters chambers
- Well chambers
- Wastewater treatment plants

# rotomoulding

# 600 rotomoulding products

heating, water, gas and sewage installations

Equipment: 17 extruding lines (5 quick switch lines)

Annual production capacity: 20.000 T/year

Raw material: PE, PP, PPR, PEX, PE-RT

Products:

- Piping for water supply systems
- Piping for irrigation systems
- Piping for gas supply systems
- Piping for internal sewage
- Piping for sanitary and heating systems

Size range: D14 - D1200 mm.
