

Guban[®]
SINCE 1937

With passion, for women!

Welcome to “Guban”: developing a shoe has never been easier!

In 1937, “Guban” began its production of women shoes and soon it became a brand of refinement and quality, which went down in history as the guarantee of the most comfortable shoes, regardless the height of the heel. Celebrities like Sophia Loren or Queen Elizabeth II wore “Guban” shoes.

Today, the company operates in Timisoara, manufacturing women shoes that stand out for their quality, comfort, femininity, sensuality, precious materials and rigorously studied details. “Guban” shoes are both classic and contemporary at the same time, combining the elegance of classic lines with the tonicity of the latest fashion trends.

Through the experience and professionalism gained in over 80 years of existence, combined with innovation and passion for excellence, we have managed to offer our customers a wide range of models, “hand-made”, made entirely out of natural leather, with an innovative design and a shoe based on medical studies.

The most remarkable shoe made in our factory is the classic Stiletto, a shoe that has not changed significantly since the ‘60s and which is the most powerful weapon of femineity and seduction. We managed to make the stiletto both attractive and comfortable, transforming its wear into a pleasure for women throughout the day, accessorizing any outfit, for an unforgettable appearance.

We can provide for you the following services:

- ❖ **Design Consultation:** you can send us your design sketches and briefings to get an initial review and quotes for product development stage.
- ❖ **Mold Development:** we can use your molds or we can produce them for you, developing also components, outsoles and inner soles.
- ❖ **Prototyping and Sampling:** this is an important process that is used as a blueprint before starting the production order
- ❖ **Small Batch Production:** we have a minimum order quantity requirement of 10 pairs/model, this allowing you to manufacture in small, medium or large quantities.

❖ **Packaging and Quality Control:** we provide you solutions for personalized packaging and we make sure that all the quality standards are met.

We say that we manufacture shoes with soul, because each pair is going thorough forty hands from the design until it gets to the feet of the one for which it was created.
